MIRAZ AI

PRICELIST 2026

Tell us the process.
In two weeks, an AI agent is working in it.

We build AI agents that take on work inside your operations. Our people review every release. You approve it, and you own the result.

Free	US$1,000	US$6,000
1-hour introduction	to begin a value-based engagement	per two-week sprint

MIRAZ AI

TWO WAYS TO PUT AN AGENT TO WORK

Pick the path that fits where you are

STEP 1 · INTRODUCTION

Free introduction

- 1 hour, online. You tell us what you are dealing with, ask anything
- An honest view on whether an agent makes sense, and the one next step

Free

STEP 2 · VALUE-BASED ENGAGEMENT

Value-Based Engagement

- We build and deploy the agent in a two-week sprint
- Then 30% of the measured net saving, billed at month 6 and month 12
- The 30% share ends after month 12

US$1,000
to begin, then 30%

STEP 3 · BUILD

Sprint

- One agent built and deployed in two weeks
- Our people review every release; you approve it
- The result is yours

US$6,000
per 2-week sprint

PAY FROM THE SAVINGS

US$1,000 to begin. Then **30% of the net saving** the agent creates, billed at month 6 and month 12.

Net saving is the saving minus the AI and cloud costs you pay. If no saving is measured, you pay no 30%. Example, not a quote: a net saving of US$100,000 over 12 months means a total fee of US$31,000 (US$1,000 + 30% × US$100,000).

HOW THE SPRINT RUNS

Days 1–2 · Scope

Needs mapped, plan and acceptance criteria agreed.

Days 3–12 · Build

Agents build, a person reviews, you approve as we go.

Days 13–14 · Handover

Working agent, documentation and code. The result is yours.

AFTER LAUNCH · OPTIONAL

Managed support is available after launch. Scope and fee are set in your contract.

Prices in US dollars. Introduction always free.
